

BSides Pyongyang CFP

On **18 November 2026**, BSides Pyongyang will host its second year of bringing the cybersecurity researchers, engineers, and practitioners from all over the world for a focused technical program delivered online.

We invite original research and technical presentations covering cybersecurity, threat analysis, defensive security, incident response, and related fields. Submissions should be based on real-world experience, technical study, or applied research.

Submit Your Research to Our Upcoming Conference

This is the time to prepare your best original presentations for BSides Pyongyang. We bring together leading researchers, IT Workers and practitioners from around the globe to share their insights, research findings, and innovative ideas. Talks will be presentation formation, 25 minutes in length. We are asking speakers to join us after in Discord to discuss their research.

We invite submissions of original research and case studies that contribute to the understanding and advancement of the global understanding around cyber operations attributed to the Democratic People’s Republic of Korea.

Review Process

All submitted abstracts and full papers will undergo a classified review process. Reviewers will evaluate submissions based on their understanding of conference theme, originality, technical accuracy, significance, and contribution to the field.

While submissions are being reviewed,
conference organizers may reach out to shortlisted speakers to schedule quick 1:1s over video call.
